

HoZe Solutions GmbH

Solving burning issues

**Wildfires emit 1.5bn tonnes CO₂e
and cause 60bn € in damages**

www.hoze-solutions.com | info@hoze-solutions.com

First **mobile** and **autonomous** wildfire containment system

800 meters length per module

Field validation in Portugal

www.hoze-solutions.com | info@hoze-solutions.com

An aerial photograph showing a large area of dense forest with many trees in shades of brown and black, indicating a fire. Several bright green hoses are snaking across the terrain, with white mist or steam rising from the points where they are being used to spray water. The hoses are connected to a network of pipes or hoses that are visible on the ground.

1. Protect **human lives**

2. Safeguard natural **carbon storage**

3. **Cost and resource efficiency**
