

## SWISSCDF

SwissCDF is a water-resistant Compact Density Fiberboard made from 100% wood. It comes with a black thru core and is offered as an eco-friendly alternative to phenolic boards (thick stock). With this high-tech core board and multilayer choice options, SwissCDF sets new standards in design, structure, and construction in interior designs.

### Swiss Krono CDF features:

- Available raw or with Swiss Krono One World TFL decors
- Very high density: 62.428lb/ft<sup>3</sup>
- Can be an alternative to phenolic boards (thick stock)
- Eco-friendly, 100% biodegradable
- Water-resistant and high resistance to humidity
- Easier and faster to machine than phenolic boards, using carbide or diamond tools.
- Highly resistant to impacts
- Edges can be polished, sealed or edge banded
- Fire and smoke classification: Class A or 1, ASTM E84\*
- CARB II and TSCA Title VI certified

\* 19mm

### Size available:

- Thickness\*: 6mm (1/4"), 8mm (5/16"), 10mm (13/32"), 12mm (1/2"), 16mm(5/8"), 19mm (3/4")
- Sheet size: 2800mm x 2070mm (110,23" x 81,5"), 62,38 sq. ft<sup>3</sup> per sheet

\*plus 0.3mm when layered with TFL.

### Suitable for:

- Lockers
- Toilet partitions
- Office furniture
- Countertops
- Wall panels
- Commercial applications
- High moisture environment\*

\*SwissCDF is approved for interior applications only.
